EDUCATION

University of British Columbia

Bachelor's Of Computer Engineering, with Co-op – Dean's List

Vancouver, BC

Sept. 2023 – May 2028

EXPERIENCE

Software Developer Intern

Softek Computer Services Incorporated

May 2025 – Aug. 2025

Toronto, ON

- Reconfigured and modernized language parsing for a financial programming language, increasing performance
- Modernized 3 critical internal and external financial applications using C# and .NET 8, improving performance and enhancing security compliance.
- Engineering a new reconciliation solution to process over 100,000 daily financial positions for a major client.
- Programmed asynchronous network handlers from core services linking them to UI instruments.
- Performed low-level performance tuning on internal network system by analyzing .NET compiler (Roslyn) behavior, allowing for optimized performance for core services.

Arm Team Member, End Effector Project

UBC Rover, University of British Columbia Design Team

Sep. 2023 – Present

Vancouver, BC

- Working on a rover competing for the University Rover Challenge and the Canadian International Rover Challenge
- Designing a Tool Changing Robotic End Effector for hazardous terrain
- Coordinated End-Effector project; coordinator between project and other members of our cross-functional team
- Designed custom parts for manufacturing, wrote test code for our robotic arm, designed our communication system with the rover-wide CAN system.

Teaching Assistant

Hatch Coding

2018 – 2019

Toronto, ON

- Helped teach ~ 20 student class in Python and JavaScript
- Provided programming assistance to students within the class

PROJECTS

UBC GradMap | *Java, Gradle, Docker, Git, JUnit, Mockito, Burp Suite*

Oct. 2024 – Present

- Created an academic planning website called UBC Gradmap
- Architected and implemented the CI/CD pipeline using GitHub actions, automating the build, testing and development process for the springboot backend.

Huawei ICPC Winter Challenge | *C++, Python, Math*

Dec. 2025 – Jan. 2025

- Competed in the Huawei ICPC Winter Challenge - developed a software package for optimizing optical switch connections for neural processing units. Ranked ~ 1000th out of 30,000 competitors
- Using Python I developed a certifier program alongside a general testing program to increase development efficiency.

Robotics Club, Club Head and Member

Upper Canada College VEX Robotics Club

2018 – 2023

Toronto, ON

- Led and managed a 54-member VEX robotics club, mentoring students in C programming and mechanical design. Securing provincial-level competition placement

TECHNICAL SKILLS

Programming Languages: Python, Java, C, C++, C#, SQL, Javascript, System Verilog

Developer Tools: VIM, Git, Linux, Docker, VS Code, Visual Studio, IntelliJ

Software: SQL Server Management Studio, MATLAB, Office Suite, Solidworks

AWARDS

William Lowell Putnam Exam (MAA): Scored in the top 50% of participants (2024)

Dean's List (UBC): Award at the University of British Columbia for Overall Academic Performance

Computer Science Award (UCC): Award at Upper Canada College for highest Computer Science grades in the year
